

## PROS vs. CONS

1-Feb-05

	Scheme A	Scheme B	Scheme C
<b>Pros</b>	Smaller school size	close to college volunteer aids	
	All k-8 on one site provides efficiency in operating costs		All k-8 on one site provides efficiency in operating costs
	Easier pickup/drop-off for transportation		Easier pickup/drop-off for transportation
	The grade configuration better fits wasl assessments		The grade configuration better fits wasl assessments
	Sager classes are under one roof. all k-4 in one building		Sager classes are under one roof. all 6-8 in one building all k-5 in one building
<b>Cons</b>	The college volunteers need to travel farther	Meadowbrook school does not adapt well to 7th and 8th graders	Meadow brook would be a larger school enrollment
		Sager student travel distance between buildings still exists	The college volunteers need to travel farther
		Davis site is 30% below OSPI recommended size.	
		Davis site will be more difficult to adapt a new building to.	
		More \$ will be spent on infrastructure than other options	
		There is more potential for site unknowns	
		Sager site is less secure because of separate buildings.	
		Davis potential size of 650 is large	
		There is more potential for traffic congestion at or around the school	
		Highest cost/lowest total building area	
	Operational costs would be higher		
	Better positions the district for long term growth		
<b>Other considerations</b>	Neighborhood school		Neighborhood school
	Grade configuration acceptance		Grade configuration acceptance
	Existing Davis site		Existing Davis site
